McCann, who had a shot at a home run, did hit an 11th-inning RBI single in the eighth inning that scored Adam LaRoche. But it was his smack-talk back to the Phillies dugout that has Braves fans talking as loudly as their favorite players. McCann "headed" back to the Philadelphia dugout with the Braves trailing 2-0 in the top of the 11th inning when he came up to pinch-hit. McCann was fortunate to be called on, as Braves starter Mike Minor looked like he was in the zone that day. After a 1-2 count, Minor got the count to 3-2 and proceeded to throw a 96.6 mph splitter that Phillies catcher Carlos Ruiz did not bite on. The ball made its way over the plate and was hit in front of the batter's box, which allowed McCann to take first base without swinging. "He told me he wouldn't swing at a [penalty]," McCann said, according to John Gant of the Atlanta Journal-Constitution. "He was like, 'Well, we just swung at it, so now you got to swing at it.'" "I didn't want to miss it, and I know you can't be a catcher hitting it," he added. McCann's bravado over the final batter before he arrived on the scene has got Braves fans buzzing. McCann: "I told him I would take it." Braves reliever Craig Kimbrel: "Oh ****." ? #Braves pic.twitter.com/WJbMEMu7kc — SportsCenter (@SportsCenter) June 23, 2017 @Braves @b_mccann @ItsTrevor

What's new in Shards Of Azuria:

Vol. 2! Japanese Kanji Combat! For the second installment in our series here at KanjiCombat, we're bringing you more

comprehensive tutorials on all the kanji featured in the video. We'll be breaking them down visually, associating them with specific kanji attack forms, which are described in a free publication in the back of the first volume. Even if you've been practicing handwriting kanji diligently for several years, you've really never developed these attacks. They're too detailed, and your writing isn't sufficiently smooth. We've compiled detailed tutorials here for you to better understand the form alone. This is a 2 volume series. We'll be releasing more in the future, so be sure to check back frequently. Grade-A Kedama (□□□□) Drills Kanji Combat's first edition featured 480 kanji, but the lower number simply represents the fact that we've gone over every kanji in depth and written a comprehensive manual about its usage and forms. We've taken the concept back to basics and shown you the core of battle. This includes everything from straight attacks to complex formation classes. In the second volume of the Japanese Kanji Combat series, we'll be putting you on the tracks of the harder to acquire Japanese calligraphy, the grade-A kedama (□□□□). This is the finest hands, full hand system of his time, and this is what we'll be showing you. Without further ado, let's get to it! Hiragana and Katakana Hiragana (□) and Katakana (□) are phonetic syllabaries used to write Japanese. The best strategy is to write them as they would be read. Unfortunately, there are a few differences as well. There's your vowel, and there's another silent character,

the na (□). As we've mentioned previously, na is a very important part of this syllabary and comes in different voices. A voice is any syllable that has a consonant attached to it. Yaha (□) and na (□) Yaha (□) as you can see in the above examples, this is the plural of yaha (□), and it looks like "yah". The na is silent. If you see a vowel that's not the vowels "a" or "u", then it's
